LARS BENEDETTO
PROGRAMMER

👤 ABOUT

For years I have provided tech support services to people, however I have recently been consulting with a company to design office automation software for them. I prefer working with the architecture and backend of a program and my language of choice is Java.

💼 WORK EXPERIENCE

VIP Traders
🌐 https://www.vipautoimporters.com/
October 2016 – November 2017

Software Developer
Analyzed the workflow of other employees and designed software to optimize the process

Highlights

◀ Built an Android app for scanning VIN bar-codes into an cloud spreadsheet
